

Automatic Seed Counter

Model : SLY-C plus

Introduction

Automatic seed Counter can automatic count many kinds of grains by setting number. In agriculture it is mainly used in grain count, exp. Rice, wheat, sorghum, corn, vegetables seed and so on.

Features

- ✧ Two modes: Free count and bulk count;
- ✧ The counting speed is adjustable;
- ✧ High accuracy: Sensitivity levels for different size of particles;
- ✧ Automatic deceleration: when counting number is close to the setting number, the counting speed slows down automatically;
- ✧ Automatic motor Protection: the motor will stop working once it detects there are no particles on the plate for 60 seconds;
- ✧ User-friendly interface: LCD screen, mode selection, counting time, level and number of particles display clearly.
- ✧ Widely application: suitable for particles including but not limited to: crop seeds, vegetable seeds, feed, diamond, tablet.

Technical parameter

Count Range	1-12mm
Count Accuracy	± 2‰
Count Speed	≥1000 /3min (Sesame)
Counting Range	1~99999
Bulk Counting	1-99999
Noise	<70db
Power	AC110V /60Hz and AC 220V /50Hz
Continuous working time	≥ 5Hr
Size of Machine	285*210*176mm
Operation Environment	-10℃ - 50℃, <85% RH
